Antipolo City, Rizal, Philippines | 0948-679-3481 | markyisulat@gmail.com

Portfolio: markpie.netlify.app

PROFESSIONAL SUMMARY

Computer Engineering student and aspiring Software Engineer with hands-on experience in full-stack web development, UI/UX design, AR/mobile game development, and database systems. Skilled in Laravel, Unity, JavaScript, Python, Java, and MySQL, with a strong focus on user-centered design and problem-solving. Experienced in software development, digital content creation, and freelance work. Seeking a software engineering internship to apply technical skills, creativity, and adaptability in modern, AI-driven development environments.

EDUCATION

University of Rizal System — BS in Computer Engineering

2023 – Present

- DOST Scholar

TECHNICAL SKILLS

- **Programming & Development:** HTML, CSS, JavaScript, PHP, Laravel, React, Java, Python, Visual Basic
- **Game & AR Development:** Unity, Augmented Reality (AR) Development, Pygame
- **Database Management:** MySQL, MS SQL, Firebase
- **Design & Creative Tools:** UI/UX Design, Graphic Design, Video Editing
- **Tools & Technologies:** Git/GitHub, Responsive Web Design, Database Systems

EXPERIENCE

AP Global IT Solutions Inc. — Graphic Designer Intern & Junior Developer

2023

- Created visual and digital assets for branding, marketing, and client-facing materials.
- Assisted with development-related tasks involving software systems and UI improvements.
- Collaborated in fast-paced project environments, balancing technical implementation with creative design solutions.

Marketing Hive — Virtual Assistant | Graphic Design, Video Editing & Social Media Support

2024 – Present

- Designed graphic assets and edited short-form promotional videos for digital marketing campaigns and social media content.
- Assisted in social media management, including content planning, scheduling, engagement support, and audience-focused content research.
- Conducted trend and content research to improve audience reach, engagement, and overall brand visibility across platforms.
- Supported clients with creative and operational tasks while maintaining consistent visual branding and content quality.

Freelance Graphic Designer & UI/UX Designer — Independent Freelance Work

2024 – Present

- Worked with multiple clients to create publication materials, branding assets, promotional graphics, and digital content.
 - Designed UI/UX concepts and interface layouts for websites, applications, and creative projects.
 - Collaborated directly with clients to transform ideas into visually engaging and user-centered designs while meeting project deadlines.
 - Managed multiple projects simultaneously, strengthening communication, adaptability, and creative problem-solving skills
-

PROJECTS

URSAC Hub — Full-Stack Organization & Marketplace Platform

Laravel, PHP, MySQL, JavaScript

Developed a centralized Laravel-based platform for university organizations to publish announcements, promote events, and sell products to students. Implemented authentication, role-based access, product management, and marketplace functionality to improve accessibility, communication, and student engagement within the university community.

AR Mobile Game Thesis Project — Unity & Augmented Reality

Unity, AR Development, UI/UX Design

Currently developing an augmented reality mobile game focused on immersive and interactive gameplay experiences. Contributed to gameplay systems, UI/UX implementation, and optimization for mobile performance.

CPE Rush — 2D Game Project

Python, Pygame

Built a custom 2D game that demonstrated object-oriented programming, interactive gameplay mechanics, and game logic implementation.

Grade Management System

Java, MySQL

Developed a database-driven grading system that streamlined student record management, automated grade computation, and improved accuracy in handling academic data.

Mang Inasal Kiosk & POS System

Visual Basic, MS SQL

Created a kiosk and point-of-sale system with integrated transaction processing and database management, improving ordering efficiency and simulating real-world restaurant workflows.

CERTIFICATIONS & ACHIEVEMENTS

- DOST Scholar
 - TESDA Online Program – Microsoft Digital Literacy Completer
 - Canva – Graphic Design Basics Completer
 - Consistent Honor Student (Junior High School & Senior High School)
-

*Available for Software Engineering, Web Development, UI/UX Design, Game Development, Visuals and Creatives
Internship Roles*
